

# Azeem Aleem

## Sr. React Js Developer

### ■ EXPERIENCE

#### Creative Handles

##### Senior Software Engineer

May 2022 - Present @ Czech Republic

- Determine Operational Feasibility, Requirements, Solution Development, Proposed Solutions, and Estimations.
- Full Stack development, preferably focusing on the front end.
- Led a Team of 5-8 Engineers where I do take follow-ups and assessed them effectively
- Managing multiple products.
- Technologies I used, MERN, JavaScript, Typescript, AWS, Rest API, GraphQL
- Developing high-performance APIs using Node.js and Utilizing GraphQL to efficiently implementing schemas, creating queries and mutations, and utilizing tools like Apollo Client for effective backend connectivity.
- Integrated Stripe API into a React application, enabling secure and efficient payment processing.
- Proficient in writing unit tests and integration tests, ensure the quality and functionality of software applications.
- Developed custom payment form inputs with React and TypeScript, integrating with payment gateway APIs, implementing form validation, error handling, and improving user experience.

#### Big Immersive

##### React Js Developer

May 2020 - May 2022 @ Lahore, Pakistan

- Implemented Algolia's advanced features such as typo tolerance, faceting, and autocomplete to enhance the search experience and improve user engagement.
- Implemented real-time notifications using WebSockets to provide instant updates and notifications to users.
- Integrated Sumsub's KYC functionality in Virtua, automating identity verification and compliance screening
- Optimized the code to improve performance using code splitting, unnecessary re-rendering, reduce memory usage, minification, avoid repetitive computation and make reusable components
- Revamped key components of Virtua into higher-order components to increase code reusability and improve application performance
- Dedicated team player who consistently led bi-weekly programming sessions, sharing expert knowledge and fostering a culture of continuous learning among colleagues.

#### DatumSquare IT Services

##### Software Engineer

Aug 2019 - April 2020 @ Lahore, Pakistan

- Proficient in using Redux for state management with middlewares such as Thunk and saga.
- Skilled in customizing Material-UI themes and styles to match brand guidelines.
- Implemented Pure-components and React memo function to prevent unnecessary re-renders.
- Use Git and GitHub to implement (CI/CD) workflows for software development projects.
- Worked to implement user validation and authentication using JWT. Worked with browser storage mechanisms such as cookies and local storage to manage user sessions and improve performance
