SUMMARY

Full-Stack Developer with 6+ years of experience building high-performance web applications for startups and enterprises. As a Microsoft Certified professional, I deliver 20+ production-grade applications supporting 100K+ users and systems handling 1M+ daily API calls. My expertise includes React.js, Next.js, and modern full-stack architectures. Beyond code, I actively share knowledge with 20K+ tech followers.

EXPERIENCE

Senior Software Engineer

Nov '23 — Present

Voltquant Pvt Ltd

London, United Kingdom (Remote)

- Built large-scale geospatial data pipelines using MapLibre, Mapbox, and Google Maps APIs, improving map rendering speed by 45%.
- Deployed secure, scalable cloud systems using AWS (EC2, S3, SES, Amplify, RDS, Cognito, Route 53, Bedrock, etc.), improving system uptime and reducing latency by 30%.
- Integrated Stripe API into a React app, enabling secure and fast transactions, reducing payment failure rate by 40%.
- Evaluated operational feasibility and proposed solutions, helping reduce estimation errors and align product direction early in the lifecycle.
- Fine-tuned GPT-based LLMs via prompt engineering with OpenAI API, enhancing accuracy of responses by 35% in QA.
- Led Agile Scrum ceremonies for 3 cross-functional teams (5-8 members each), delivering 12 major releases ahead of schedule with 98% sprint goal completion rate.
- Scaled data processing using Azure Functions, Cosmos DB, and Blob Storage, reducing operational costs by 25% through serverless architecture and optimized indexing strategies.
- Automated document workflows with Azure Indexer and Cosmos DB, improving search efficiency by 50% for enterprise-scale applications.
- Developed systematic prompt testing frameworks that enhanced GPT-4 output accuracy by 55% across customer support automation workflows.

Senior Software Engineer

Aug '22 — Oct '22

Creative Handles

Czechia (Remote)

- Led full-stack development with a frontend focus, delivering modern, responsive web features that boosted user retention.
- Built scalable APIs using Node.js and GraphQL, designing schemas and queries with Apollo Client to enhance backend performance and flexibility.
- Developed secure payment forms with React and TypeScript, integrating APIs with custom validation and error handling, improving user experience by 30%.
- Wrote comprehensive unit and integration tests, reducing post-release bugs by 40% and increasing deployment confidence.
- Utilized the MERN stack, AWS, REST APIs, and GraphQL to deliver performant and maintainable web applications.
- Expertise in Git version control, implementing branching strategies and workflows that reduced merge conflicts by 30%.
- Implemented CI/CD pipelines (GitHub Actions/Jenkins) automating 90% of deployments, reducing release cycles from days to hours.
- Optimized frontend build pipelines using Webpack and Babel, reducing bundle sizes by 40% and improving page load performance by 30%.
- Applied Next.js SSR for 8+ production apps, achieving 95+ Lighthouse scores and improving SEO traffic by 60% for content-heavy platforms.

React Js Developer

May '21 — May '22

BIG IMMERSIVE

Lahore, Pakistan

- Enhanced search UX by integrating Algolia with typo tolerance, autocomplete, and faceting, boosting user engagement by 25%.
- Built real-time notification features using WebSockets, improving user responsiveness and interaction rates.
- Containerized 20+ microservices using Docker and orchestrated with Kubernetes, improving deployment frequency by 5x while reducing cloud costs by 35%.
- Built AI-augmented UI components (React) that increased user trust scores by 30% by making model decisions explainable and editable.
- Integrated Sumsub's KYC service into VIRTUA, automating identity verification and reducing manual review time by 60%.
- Improved app performance through code splitting, reduced re-renders, and reusable components, cutting load time by 40%.
- Led bi-weekly peer programming sessions, sharing best practices and promoting a culture of continuous learning.
- Engineered comprehensive test suites using Jest (unit) and Cypress (E2E), achieving 95% test coverage and reducing production bugs by 60%.

Software Engineer	Jan '19 — May '21
Dablew Tech	Lahore, Pakistan
- Architected responsive frameworks supporting 100+ device breakpoints, improving mobile conversion rates by 22% for e-commerce platforms. - Managed complex app states using Redux with Thunk and Saga, improving UI responsiveness and maintainability. - Customized Material-UI themes to align with brand identity, enhancing UI consistency across components. - Streamlined CI/CD workflows using Git and GitHub, accelerating development and deployment cycles. - Worked on JWT-based user authentication and session management with cookies and local storage, boosting security and performance. - Established standardized code review processes that reduced production defects by 35% and boosted onboarding time for new developers by 50%. - Built accessible component libraries (ARIA, keyboard nav) adopted company-wide, decreasing screen reader UX issues by 80% in user testing.	

EDUCATION

Bachelor in Information Technology , University of Education	Jan '15 — Dec '19
	Lahore, Pakistan

AWARDS

MCSA- Microsoft Certified Solutions Associate Microsoft	Jan '01
LinkedIn Influencer Serving thought-provoking material on LinkedIn to a Community of over 20,000 developers.	
General Data Protection Regulation (GDPR) EasyLlama	Jan '01

PROJECTS

Voltquant , www.voltquant.uk A platform that collects and analyses grid and land data for developers who want a grid connection.	
Feelo , www.feelo.lk Feelo collaborated restaurants and hotels with unique experiences for users which come in as deals	
Virtua , https://virtua.com/ Virua is a truly immersive digital collectibles platform across mobile, AR & VR, with unique social experiences, all enabled by Blockchain!	
WorkinAus , https://workinaus.com.au/ WorkinAUS is a jobs marketplace for Australian employers and recruiters who want to hire them.	
Loonoy , https://loonoy.netlify.app/ This Platform is built for online commerce, allowing users to purchase products online	
Job Seekers , https://hire.workinaus.com.au/employer A platform specifically built for HR related tasks and centralized hub for HR activities.	

SKILLS

Programming Languages Typescript, JavaScript	
Frontend Frameworks HTML5, CSS, React Js, Next js, Redux Thunk & Saga, Ant Design, Material UI, Tailwind,Sass/less, Redux query, RTK, Styled Components, redux toolkit, Tailwind CSS, Bootstrap, ES6, Context API, Webpack, babel, UI/UX, SSR	
Backend Technologies Express, GraphQL, MongoDB, PostgreSQL, Redis, Microservices, Rest APIs, Node.js	
Cloud Services AWS EC2 Instance, S3 Bucket, AWS RDS, AWS SES, AWS Bedrock GPT LLM, Cloud Front, AWS Cognito, Azure Functions, Blob Storage, Git, CI/CD, docker	
Analytics and Monitoring Algolia, Gleap, Google Analytics, Hotjar, Clicky	
Testing JEST, Cypress, Performance Optimization
