

Azeem Aleem

Sr. Software Engineer(MERN)

■ EXPERIENCE

Voltquant Pvt Ltd

Senior Software Engineer

Nov 2023 - Present @London- UK

- Evaluated operational feasibility and proposed solutions, helping reduce estimation errors and align product direction early in the lifecycle.
- Built large-scale geospatial data pipelines using MapLibre, Mapbox, and Google Maps APIs, improving map rendering speed by 45%.
- Deployed secure, scalable cloud systems using AWS ((EC2, S3, SES, Amplify, RDS, Cognito, Route 53, Bedrock, etc.), improving system uptime and reducing latency by 30%.
- Fine-tuned GPT-based LLMs via prompt engineering with OpenAI API, enhancing accuracy of responses by 35% in QA tests.
- Integrated Stripe API into a React app, enabling secure and fast transactions, reducing payment failure rate by 40%.
- Led and mentored a team of 5-8 engineers, improving task completion rates and team velocity through regular check-ins and support.

Creative Handles

Senior Software Engineer

May 2022 - Oct 2023 @Czech Republic

- Led full-stack development with a frontend focus, delivering modern, responsive web features that boosted user retention.
- Built scalable APIs using Node.js and GraphQL, designing schemas and queries with Apollo Client to enhance backend performance and flexibility.
- Developed secure payment forms with React and TypeScript, integrating APIs with custom validation and error handling, improving user experience by 30%.
- Wrote comprehensive unit and integration tests, reducing post-release bugs by 40% and increasing deployment confidence.
- Utilized the MERN stack, AWS, REST APIs, and GraphQL to deliver performant and maintainable web applications.

Big Immersive

React Js Developer

May 2020 - May 2022 @Lahore, Pakistan

- Enhanced search UX by integrating Algolia with typo tolerance, autocomplete, and faceting, boosting user engagement by 25%.
- Built real-time notification features using WebSockets, improving user responsiveness and interaction rates.
- Integrated Sumsu's KYC service into VIRTUA, automating identity verification and reducing manual review time by 60%.
- Improved app performance through code splitting, reduced re-renders, and reusable components, cutting load time by 40%.
- Led bi-weekly peer programming sessions, sharing best practices and promoting a culture of continuous learning.

DatumSquare IT Services

Software Engineer

Aug 2019 - April 2020 @Lahore, Pakistan

- Managed complex app states using Redux with Thunk and Saga, improving UI responsiveness and maintainability.
- Customized Material-UI themes to align with brand identity, enhancing UI consistency across components.
- Streamlined CI/CD workflows using Git and GitHub, accelerating development and deployment cycles.
- Implemented JWT-based user authentication and session management with cookies and local storage, boosting security and performance.

■ EDUCATION

University of Education

Bachelor of Sciences in

Information Technology

2015 - 2019 - 4 years, Township

Campus, Lahore, Pakistan

■ SKILLS

Node js	React Js
Typescript	AWS
Next js	EC2 Instance
Redux	S3 Bucket
Thunk & Saga	AWS RDS
Ant Design	AWS SES
GraphQL	AWS Bedrock
Tailwind,Sass/less	GPT LLM
Styled Components	Cloud Front
PostgreSQL	AWS Cognito
Cosmos DB	Algolia
Express	Geleap
MongoDB	Hotjar
Material UI	Clicky
Bootstarp	Google Analytics
Auth0	Leaflet
Stripe	Maplibree
HTML5/CSS3	Azure Functions
Git/Github	Blob Storage

■ MOST PROUD OF

LinkedIn Influencer 2021-2023

Serving thought-provoking material on LinkedIn to a Community of over 20,000 developers.

■ PROJECTS

Voltquant

www.voltquant.uk

Grid Connection Service

A platform that collects and analyses grid and land data for developers who want a grid connection.

Feelo

www.feelo.uk

Booking Services for tourists
